Spun Aluminum Bell Shells

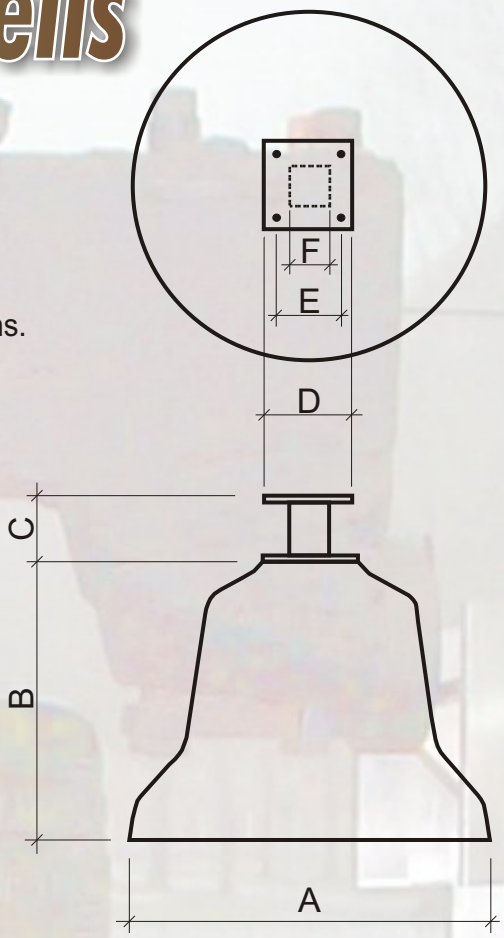
Clock Tower Shown With A Campbellsville Bell Shell

Bell Shells give the appearance of cast bronze bells, but at a fraction of the cost. They compliment bell towers or the open belfry of a cupola or steeple, plus many other applications.

Bell Shells are spun from aluminum, and are finished with a durable exterior industrial bronze finish, or can be finished in a custom color to meet a decorative color scheme.

Anchoring can be directly to the Bell Shell, or an optional anchoring collar may be purchased. All holes are pre-drilled for an easy installation.

There are 5 popular sizes of Bell Shells available, plus we can furnish special sizes.



DIMENSION CHART

A Diameter	B Height	C Anchor Ht.	D Anchor Pl.	E Bolt Dim.	F Collar Dia.
40”	32”	13”	12”	9”	4”
32”	26”	10”	8”	6 ½”	3”
