

## STOCK KYNAR COLORS

**White**

**Colonial White**

**Creme**

**Modern Ivory**

**Sandstone**

**Patina Green**

**Medium Bronze**

Kynar colors that are applied to .032" aluminum with the roll-coat method. Other nonstock Kynar finishes are available at additional cost.

We can also match your custom color with our custom mixed exterior enamels that are shop applied at our factory.

Printed color value may vary slightly from actual colors.

**Alltrista Zinc**

## SELF-WEATHERING METALS

Campbellville also offers our a wide range of traditional self-weathering metals that are furnished in their natural state for patination. The example shown to the left is Alltrista Zinc which will weather to a slate gray patina with age. It will have the look of slate but without the cost, breakage, or weight of slate. Other popular self-weathering metals are: copper, lead coated copper, terne coated stainless, and stainless steel. Consult the factory for actual samples, as these do not reproduce well in print.

## TEXTURED FINISH

The look of stone without the cost or weight normally associated with cast or cut stone! Campbellville is pleased to offer our exclusive **AlumaStone™** finish to those who need a textured finish for your project application. This versatile finish can be applied to our aluminum balustrade railing for a cast stone appearance, or to our cornice, cupolas, and steeples. The AlumaStone can also be tinted to different colors as required to match surrounding stone colors, or any of our stock colors shown above can be utilized.
